### PROJECTS

#### Mere Personal Gurur, Online Learning Portal

01/2024 – present

An online teaching place , which comes with an idea of one teacher for each students i.e. A Personal Guru .

Front-end : ReactJs , Redux , Tailwind CSS , Antd

Back-end : Node.js , Express , JWT

Database : MongoDB

#### MERN Stack Portfolio, Portfolio

07/2023 – 08/2023

My portfolio made using MERN stack . The data in the front-end is fetched from the database directly instead of fetching from the code . For this , Backend is used to update and fetch the latest data uploaded by the user.

**Twitter Clone, *Twitter Clone***

06/2023 – 07/2023

A full stack twitter clone. In this clone, I have used Multer library to upload the images, also implemented cloudinary cloud storage for image uploading. Also, I used MongoDB atlas for uploading data in database.

**E-commerce, *An E-commerce Website***

05/2023 – 06/2023

A full stack E-commerce app , where user can sell/buy fashion apparels. This application has two different user types i.e. user and admin . I've used jwt for authentication and bcrypt for storing password in hash form.

**Reactogram, *Instagram Clone***

04/2023 – 05/2023

A social media app which allows user to upload , delete , like , dislike , comment on each other post. I have used non-relational database i.e. MongoDB and performed CRUD operations . I've also used technologies like Reactjs, Node.js , Express Js and Redux .
